Error Check

- It is able to check Error message while using GIANT PRO if error is generated.
- It will give the types of error and its troubleshooting.

① When generated error, run Error Check, then if the message "tag on GIANT PRO", is shown, tag on smart phone to the printer.

② After tag the device on, it will show the types of error and troubleshooting for each case.

Maintenance Report

Maintenance Report

- It provides maintenance report of GIANT PRO.
- In case of WLAN or LAN interface, Mac Address information will be displayed.

① After running Maintenance menu, if the message "tag on GIANT PRO" is displayed, tag on smart phone to printer.

② After tagging on the smart phone, you can check current maintenance report and Mac Address of printer.

NFC Tag

◆ What is NFC Tag?

- GIANT PRO provides NFC Tag function. It supports many useful functions to the customers through it.
- When setting NFC Tag function provided by GIANT PRO APP, the customer has no need to install APP. By tagging on smart phone which supports NFC to GIANT PRO, the customer can use the services.

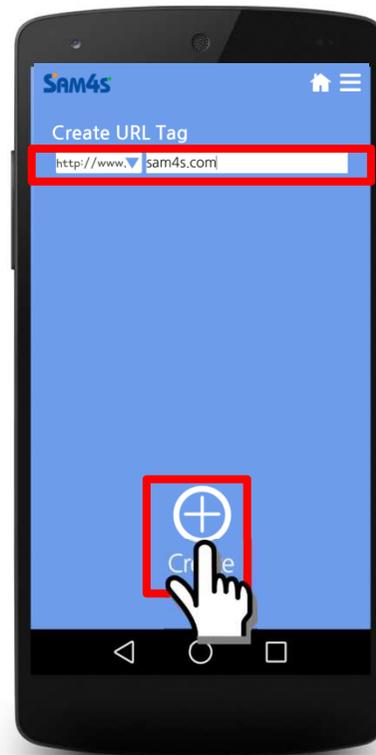

🌐 URI

- It is a function to support Web Link such as web sites that can be done by NFC Tag.
- Ex) If the shop owner wants to introduce the Shop's web site or event web page to customers

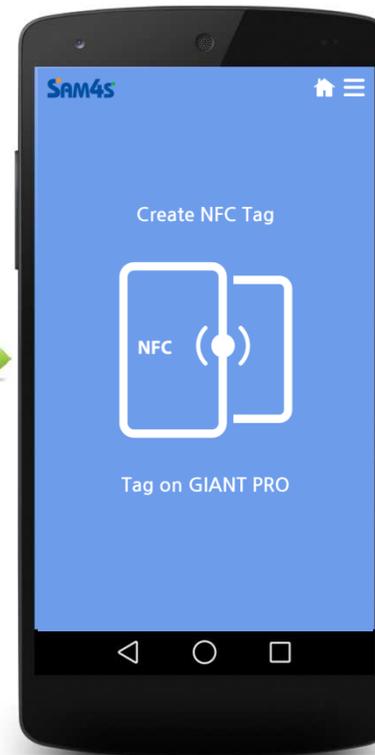

① Run URI in NFC Tag Menu

② Type in preferred web address, then press "Create".

③ If the message "tag on GIANT PRO" is displayed, tag on smart phone to printer.

④ After closing APP, check if the right web page is linked when the smart phone is tagged on the printer.

NFC Tag

Contact

- This feature allows you to create contact information using NFC Tag.
- Ex) Easily delivering Shop contact information to customers.

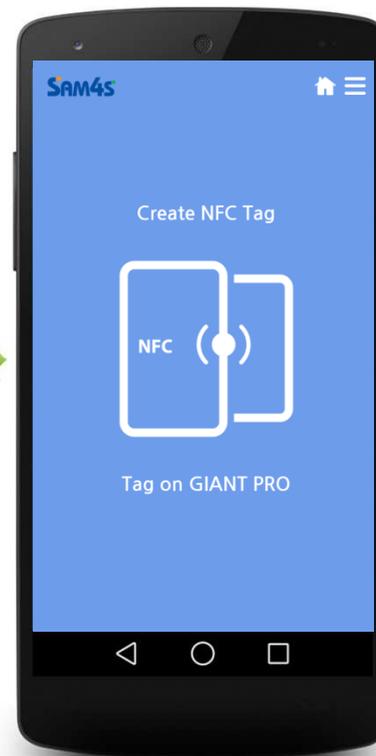

① Run Contact on NFC Tag menu.

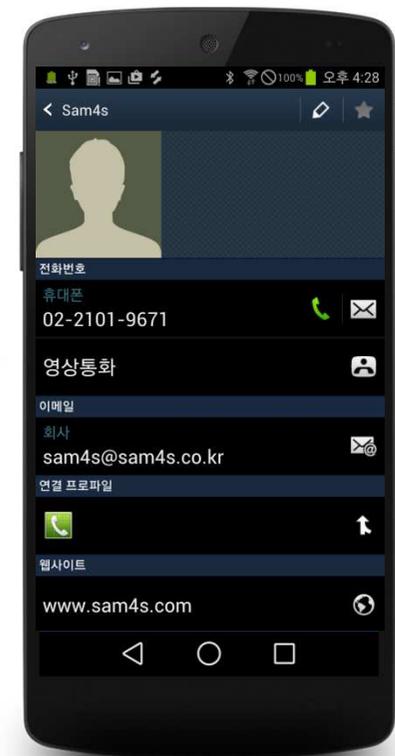

② Enter the contact information or Import it from contact list and press "Create" button to send Contact Info

③ If the message "tag on GIANT PRO" is displayed, tag on smart phone to printer.

④ Check whether the contact information is properly saved by tagging smart phone on printer after APP termination.

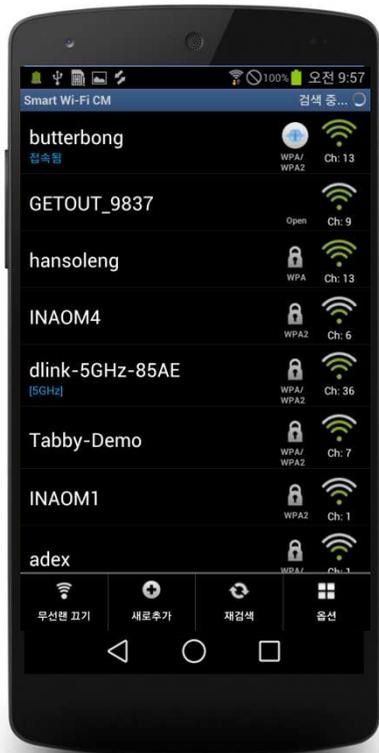

NFC Tag

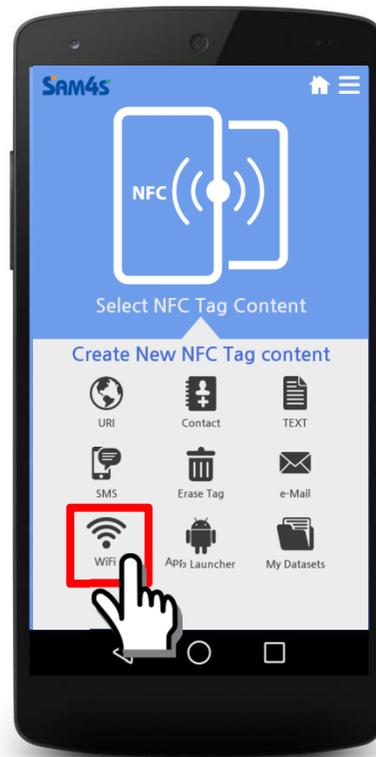

WiFi

- This feature allows you to set WiFi connection information to NFC Tag.
- Ex) Easy delivering Free WiFi connection information to customers at the Shop.

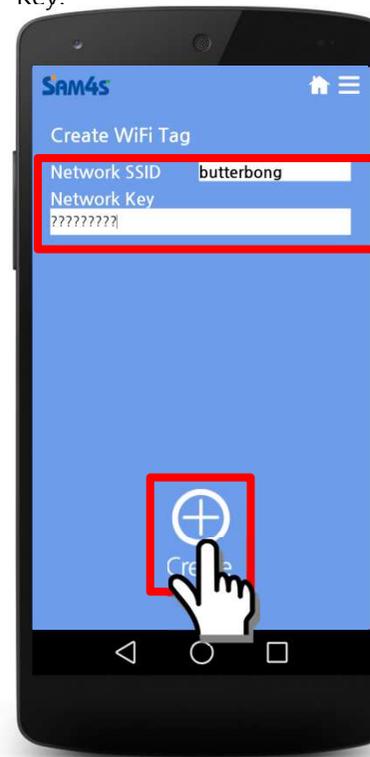

① Connect your smart phone to WiFi which has connection information to be saved into NFC tag.

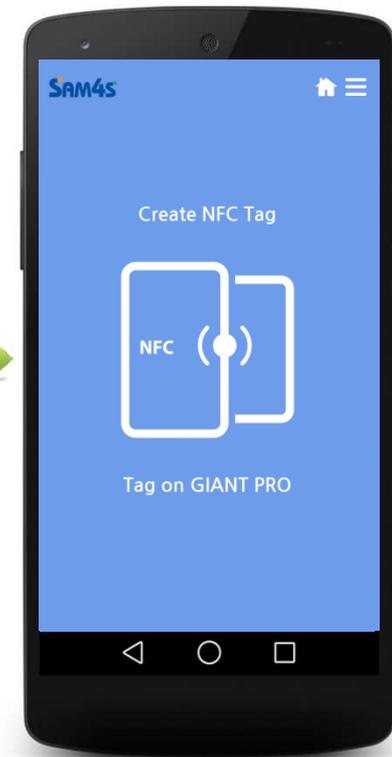

② Run WiFi on NFC Tag menu.

③ Network SSID : SSID from WiFi Device being connected will be automatically inserted
Network Key : enter Network Key.

④ If the message "tag on GIANT PRO" is displayed, tag on smart phone to printer.

⑤ Check whether the WiFi connection is properly done by tagging smart phone on printer after APP termination.

© other features.

TEXT

- This feature allows you to save the memo/text using NFC Tag.
- Ex) Delivering Discount event, promotion items information to customers.

App Launcher

- This feature allows you to set auto-run or to-be-installed APP using NFC Tag.
- Ex) Easy APP operation or APP download from Google Play on Customer's Device at the Shop.

SMS/e-Mail

- This feature allows you to run Text Message & Email on Customer's Device.
- Ex) Customer FAQ, customer satisfactory poll etc.

Erase Tag

Smart WiFi Link

Smart WiFi Link

- This feature allows you to set the Interface of **GIANT PRO WLAN**.
- Support 2 types of setting mode : Infrastructure Mode / AP Mode.

- Infrastructure Mode : connecting GIANT PRO to POS Terminal via WiFi.

- ① Connect your smart phone to WiFi which you want to connect to GIANT PRO.
- ② Run Smart WiFi Link after starting APP.
Network SSID : SSID from WiFi Device being connected will be automatically inserted
Network Key : enter Network Key.
- ③ Select Infra Mode, enter IP information, and press "Create" button. (IP auto-allocation : select DHCP, and press "Create" button.)
- ④ If the message "tag on GIANT PRO" is displayed, tag on smart phone to printer. GIANT PRO automatically starts process needed for WLAN settings.

- ⑤ When settings is correctly done and connected to WiFi, GIANT PRO prints self-test page.

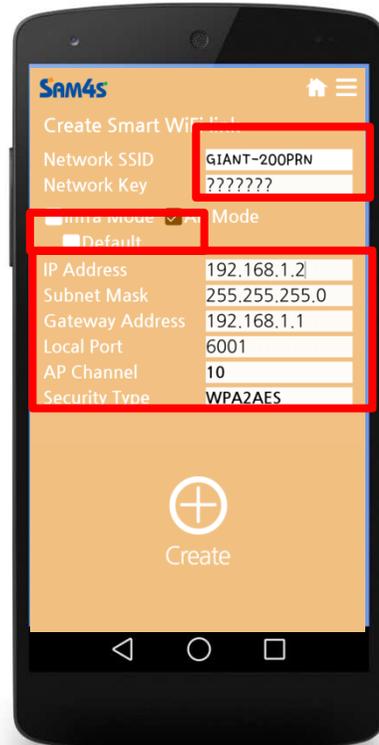

Smart WiFi Link

- **AP Mode** : When GIANT PRO functions as AP (Access Point) and either POS, Tablet or Smart Phone directly connect to GIANT PRO via Wi-Fi communication.

① Run Smart WiFi Link and Select AP Mode.

② Enter the information of the AP that you wish to set-up (SSID, IP, Security and etc.) Once you complete the setting, press Create. (if progressing with default setting, select Default and press Create.)

③ If the message "tag on GIANT PRO" is displayed, tag on smart phone to printer. After tagging, GIANT PRO will function as Access Point you set before

④ Once you complete the set up and search WiFi, you will confirm the GIANT PRO on list as an AP set by you

Bluetooth Pairing

✦ Bluetooth Pairing

- When GIANT PRO is used with ELLIXBLUE(Bluetooth-Dongle), it supports pairing function with a smart device.
- ELLIXBLUE(Bluetooth-Dongle) must be set as the Slave.

- ① Run Smart BT Link and when you see below screen, tag the smart phone on the printer.
- ② After tagging, when you see "Tag on GIANT PRO again" message, tag off the smart device and tag on the printer once more.
- ③ After tagging, bluetooth Information to be paired will appear as below screen and once you press Create, it will automatically start pairing with smart phone and bluetooth dongle.
- ④ Once pairing is complete, the pop-up message will appear for Test Sample Print as below screen. Select "Yes" from the pop-up message.

- ⑤ If pairing is successfully done, select "Yes" and it will print out Test Page from GIANT PRO.

GIANT PRO Solutions

GIANT PRO supports various solution development with the use of NFC.
(Ex. Issuing Coupon, e-Receipt, Membership Point System and etc.)
