

MAC Driver Installation

- 1、The most important thing is do not change the files' name or location.
- 2、Find the install.command file,double click it.

- 3、Input your mac login password in terminal.After inputing you need press enter button on your keyboard.(Notice that it can't be seen during your input)

- 1、Then,the pos driver will be installed.

```
ding — install.command — 80x24
Last login: Wed Oct  9 13:56:52 on ttys000
dingdeMacBook-Pro:~ ding$ /Users/ding/Desktop/Macdriver/POS_MAC/install.command
; exit;
[Password:
logout
Saving session...
...copying shared history...
...saving history...truncating history files...
...completed.

[进程已完成]
```

4、 If you want to check the file in filter,you need open mac termial(If your mac shortcut is default setting,you can use “command+space” to search terminal).Input “open /usr/libexec/cups/filter”.Notice that there is a whitespace in “open” and “/usr/libexec/cups/filter”

```
ding — -bash — 80x24
Last login: Wed Oct  9 14:05:02 on ttys000
dingdeMacBook-Pro:~ ding$ open /usr/libexec/cups/filter
dingdeMacBook-Pro:~ ding$
```

5、 You can find pos in filter directory.
